### About the Measure

**Domain:** PTSD  
**Measure:** Military Deployment Risk and Resilience  
**Definition:** A questionnaire to assess key deployment-related risk and resilience factors.  
**Purpose:** Deployment exposures are associated with an array of negative mental health outcomes, including Posttraumatic Stress Disorder (PTSD), depression, anxiety, and substance abuse.

### About the Protocol

**Description of Protocol:** The Deployment Risk and Resiliency Inventory-2 (DRRI-2) is a suite of 17 individual scales that assess key deployment-related risk and resilience factors with demonstrated implications for Veterans' post-deployment health. Items are rated on Likert-style scales and added together to give a score for each scale.

**Selection Rationale:** The Deployment Risk and Resilience Inventory-2 (DRRI-2) is a self-administered, widely-used, reliable, psychometrically sound instrument that captures deployment and war-zone experiences relevant to contemporary warfare (e.g., recent wars in Iraq and Afghanistan) that affect the health and well-being of Veterans.

**Specific Instructions:** Four subscales (Difficult Living and Working Environment, Combat Experiences, Aftermath of Battle, and Perceived Threat) from the Deployment Risk and Resilience Inventory-2 (DRRI-2) are included in Trauma Adversity and Exposure.

**Protocol Text:** **Summary of the DRRI-2:**

The Deployment Risk and Resiliency Inventory-2 (DRRI-2) is a suite of 17 individual scales that assess key deployment-related risk and resilience factors grouped into Pre-deployment Factors, Deployment Factors, and Post-deployment Factors.

- **Pre-deployment Factors**
  - Prior Stressors
  - Childhood Family Functioning

- **Deployment Factors**
  - Difficult Living and Working Environment
  - Combat Experiences
  - Aftermath of Battle
  - Nuclear, Biological and Chemical Exposures
  - Perceived Threat
  - Preparedness
  - Deployment Support from Family and Friends
  - Unit Social Support
  - General Harassment
  - Sexual Harassment
  - Concerns about Life and Family Disruptions
### Availability:
The Deployment Risk and Resilience Inventory-2 (DRRI-2) is available for download from the National Center for PTSD at [www.ptsd.va.gov](http://www.ptsd.va.gov).

### Participant:
Adults, ages 18 and older.

### Source:

### Language of Source:
English

### Personnel and Training Required:
None

### Equipment Needs:
None

### Protocol Type:
Self-administered protocol

### Requirements:
