

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Summary of the Visual Memory Subtests of the Children's Memory Scale

The Children's Memory Scale® visual memory tasks include the ability to remember and recognize faces, remember position and location of people in a series of photographs, and remember the locations of pictures within a rectangle.

The Visual Memory subtest of the Children's Memory Scale® is a proprietary interviewer-administered test. Each Children's Memory Scale® subtest is a part of a complete Children's Memory Scale® assessment and is not sold separately. To administer a subtest requires a licensing agreement from Pearson.
