

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Summary of the Test of Word Reading Efficiency-Second Edition (TOWRE-2)

The Test of Word Reading Efficiency-Second Edition (TOWRE-2) contains two subtests: the Sight Word Efficiency (SWE) subtest, and the Phonemic Decoding Efficiency (PDE) subtest. The SWE subtest assesses the number of printed sight words that can be accurately identified and pronounced in 45 seconds. The PDE subtest measures the number of printed nonwords that can be accurately decoded (“sounded out”) in 45 seconds.
