

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Wechsler Intelligence Scale for Children[®]-Fifth Edition (WISC[®]-V) is a tool designed to assess an individual's cognitive abilities and is administered by a trained professional. The WISC[®]-V consists of a core battery of subtests, which focus on five specific domains (verbal comprehension, processing speed, visual spatial, working memory, and fluid reasoning), as well as optional ancillary subtests. These ancillary subtests measure areas that are important to areas of academic achievement.

The WISC[®]-V is a proprietary instrument and is available online from Pearson at www.pearsonclinical.com.
