

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Summary of the Vineland Adaptive Behavior Scales, Second Edition (Vineland™-II)

The Vineland Adaptive Behavior Scales, Second Edition (Vineland™-II) is a parent or caregiver structured interview administered by a trained professional that measures day-to-day performance on communication, daily living, socialization, and motor skills. Standard scores can be derived for communication, daily living, socialization, and motor skills subtests or combined to create an Adaptive Behavior Composite (ABC).

The Vineland™-II is a proprietary protocol and administration requires a license from Pearson, Inc.
