

Protocol for assessment of potential risk factors for coronavirus disease 2019 (COVID-19) among health workers in a health care setting

Form 3: Symptom diary for health workers

Symptom diaries will be provided to each health worker, for them to record the presence or absence of various signs or symptoms for a minimum of 21 days after the administration of the initial questionnaire (Form 1).

The symptom diary template provided below is generic. In the context of a new virus with uncertain clinical presentation and spectrum, symptom diaries may be broadened to include vomiting, diarrhoea, abdominal pain, etc., as relevant, and may be altered to include symptom data for longer than 14 days.

In the event of the contact developing any of these symptoms, ask them to inform your local public health team.
