

The fitted mean curves  $\pm 2$  SEM for the nonachondroplastic and achondroplastic populations by age in months are shown for the transverse dimension in (a) and for the sagittal dimension in (b). The study population included 154 transverse and 148 sagittal measurements from 154 achondroplastic individuals. Hecht JT et al. Growth of the Foramen Magnum in Achondroplasia. *Am J Med Genet* 32:528-35, (1989) Copyright © 1989 Alan R. Liss, Inc.
